Models

- F5MC48N 26" deep self-contained drop in display section
- F5MC72N 26" deep self-contained drop in display section

F5MC72N

Standard Features

- Display exterior sides are made of 18-gauge stainless steel
- Galvanized steel reinforced ABS plastic interior sides with molded shelf supports
- (4) adjustable epoxy coated wire shelves
- On/off switch for the display section light(s)
- Top mount coil with multiple fans circulating the air throughout the cabinet Display section runs off a thermostatic control
- Sliding and removable self-closing 0.50" thick argon filled, low-E, warm edge insert, thermopane glass doors with left and right vertical gasket
- High density environmentally friendly, Kyoto Protocol Compliant, Non ODP (Ozone Depletion Potential), Non GWP (Global Warming Potential) polyurethane foam throughout unit
- Single service display section with mirrored
- Environmentally friendly HFC-404A refrigerant
- One year parts and 90 day labor standard warranty

Options & Accessories

- 48" shelf (48" long units only)
- 72" shelf (72" long units only)
- Stainless steel back
- Laminate ends
- 220 volt/50 cycle inclusion of this option will alter specifications

Specifications

Display section exterior sides are made of 18-gauge stainless steel. Exterior display section top to be 22-gauge galvanized metal. Interior sides are made of galvanized steel reinforced 0.095" thick ABS plastic with molded shelf supports. The interior bottom is constructed with stainless steel for long lasting durability. Display section is fully insulated with high density environmentally friendly, Kyoto Protocol Compliant, Non ODP (Ozone Depletion Potential), Non GWP (Global Warming Potential) polyurethane foam between the interior and exterior. Four adjustable epoxy coated wire shelves are provided for the display section. An on/off switch for the display section light(s) is located at the right end of the front facing, above the display section doors.

Display case refrigeration system consists of a full-length top mounted coil with multiple fans circulating the air throughout the cabinet utilizing a thermostatic control. An ABS plastic drip pan is placed below the coil with a clear drain hose for running the condensation to the lower base mechanical

Front of the display section is equipped with two sliding and removable self-closing 0.50" thick argon filled, low-e glass

doors with a warm edge spacer. The vertical outsides of each door tuck into an extruded channel running vertically up each side. Front nosing to be stainless steel.

Self-contained models have a pre-wired condensing unit housed in a 16-gauge cage hanging form the units exterior bottom. Cage also is supplied with an 8' cord and plug and electrical junction box. Electrical connections are 115V-60H-1PH

Refrigeration system components are HFC-404A. Display cabinet blower coil assembly shall have a coated evaporator coil and fans. Interior refrigerated base cabinet and display section to maintain 36°F to 40°F temperatures at 100°F ambient room temperature.

Back has 2" thick panel, constructed on 22-gauge stainless steel interior, 2" of high-density polyurethane foam and 22gauge galvanized steel exterior. Interior of back panel has (2) angled glass mirrors.

Using the supplied louvered panels, refrigeration system is designed so air will flow:

- Front to rear on 48" models
- · Right to left on 72" models

Louver cut-out dimensions are:

• 22" by 11" (56cm x 28cm)

Unobstructed airflow must be maintained to insure unit performance and maintain warranty.
