

ENERGY STAR equipment from Cleveland Range

Commercial Steam Cookers

Steam Cookers, also known as “compartment steamers”, that have earned the ENERGY STAR are up to 50% more energy-efficient than standard models.

Earning the ENERGY STAR

ENERGY STAR qualified steam cookers include both electric and gas models. Steam cookers that earn the ENERGY STAR must meet a minimum cooking efficiency* of 50 percent (electric) and 38 percent (gas) while also meeting maximum idle energy rates. Idle energy rates are given for 3-, 4-, 5-, and 6-pan sizes.

Energy efficient steam cookers that have earned the ENERGY STAR offer shorter cook times, higher production rates, and reduced heat loss due to better insulation and more efficient steam delivery system.

In addition to saving energy, ENERGY STAR qualified steam cookers also save water - 90 percent or more when compared with standard steam cooker models (using on average 3 gallons of water per hour for ENERGY STAR qualified steam cookers versus 40 gallons of water per hour for standard models). [Saving water helps protect our nation's water supplies.](#)

*Under heavy-load conditions

ENERGY STAR® Qualified Commercial Steam Cookers as of May 3, 2010

Brand Name	Model Name	Model Number	Product Type	Steamer Technology	Pan Capacity	Fuel Type	Cooking Energy Efficiency (%)	Idle Energy Rate		Date Available
